Imagitek, Ltd Announces International Distributors For Innovative Prodagio Software Business Applications

Houston, TX; June 18, 2008...Imagitek, Ltd., developer of world-class Prodagio™ Software business applications for accounts payable, case management, contracts management and self-service, today announced three new international distributors in Canada, France and the United Kingdom.

“In addition to our domestic success, the demand for Prodagio solutions continues to grow overseas,” said Mara Henderson, president. “We expect this trend to continue as more foreign-based companies are exposed to the value of these applications for optimizing financial controls and improving a multitude of operational efficiencies.”

In Canada, Prodagio has named ARC Business Solutions, which has tremendous market recognition in that country. ARC has extensive experience in content management solutions, and provides a solid partnership, with a highly satisfied customer base. With offices in Toronto, Calgary and Edmonton, ARC provides an exceptional local presence in key Canadian markets.

In France, Ascience, an Altran company with major global accounts, specializes in supply chain management and procure-to-pay applications. The company will both distribute and implement Prodagio applications. Ascience brings a compelling domain expertise, and a highly dedicated team on behalf of Prodagio applications.

Altran CIS UK provides strong experience delivering financial controls, P2P and case management solutions in the UK, leveraging content management technology. With a presence in more than 500 major UK accounts and government agencies, Altran offers a significant footprint to distribute and implement Prodagio solutions.

“Prodagio applications are well-positioned for the European market, as well as other regions of the world” said Paul Rollason, managing director, Altran CIS UK. “We believe this is the starting point of a highly successful international expansion for the company and its applications.”

Prodagio will continue to pursue strategic agreements with international distributors as a means of accelerating the company’s business growth.

About Imagitek Ltd.

Imagitek, Ltd., an Altran company, is a provider of off-the-shelf business applications that work seamlessly with content management and ERP systems.
